**Downloading and  
getting started in  
Lightroom CC**

# GETTING YOUR PHONE SET UP

Adobe Lightroom CC app is FREE. So you will need to download the App to use our Presets.

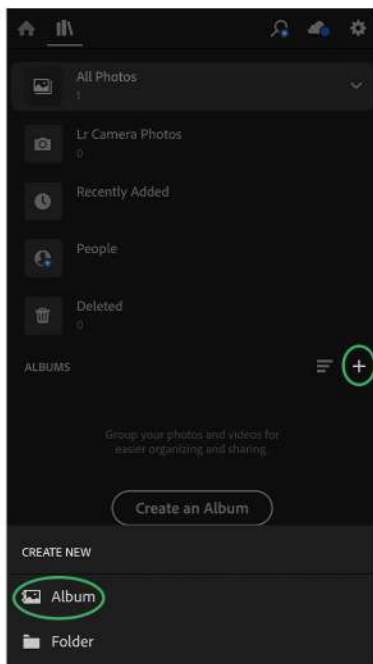

First download the Lightroom CC App from the App Store.

Access your Mobile Presets from your Etsy Purchases and Reviews tab and download your DNG files to your Device.

# IMPORTING YOUR DNG FILES

You will need to import your downloaded DNG files from Etsy to your Lightroom App

Open your Lightroom App and create a new album to import your DNGs into. You can name the folder “Victoria Eden Presets” or any other way you like.

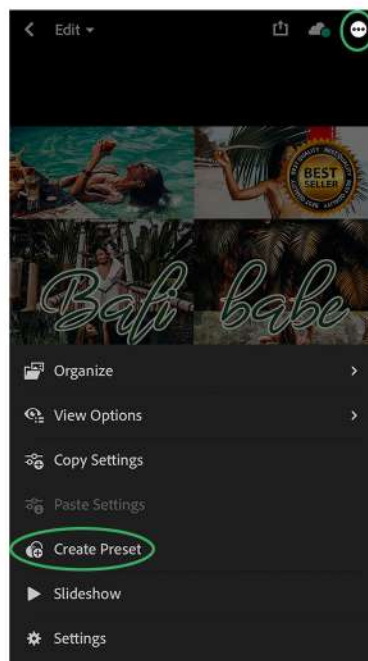

After you have created the album import new DNG files into the album by clicking on the blue “Add Photos” icon at the bottom right of the app. Your DNGs will look like you see in example.

## STEP 2

# SAVE YOUR PRESETS

You can save the Presets to your Lightroom App for easier access and permanent use.

Click on one of the imported DNG files. Click on the three dots in the top right corner of the screen. Select "Create Preset". A box will pop up to name and save the presets. Name them and click on the checkmark in the top right to save.

Now import your images to your Lightroom App and select the one you want to edit. Click on your Preset you want to apply. And you are all set!

Happy editing!

xoxo Victoria Eden

## STEP 3
